## Description :

Prsentation de l'diteurA near-future sci-fi thriller on life, death, the universe and our place within it."Wow ... the only book I read in 2016 to get five stars.... the finale of the story blew me away," 5 stars, Roger Keays, author of 100% Love Guaranteed."Cant wait for the movie a testament to the bright future of fiction," 5 stars, B. Stadelmann, author of The City of God."Unique and captivating made me think of Arrival and Interstellar," 5 stars, Mark Len Mayfield, author of Wayward Pines: The Journey of Peter McCall.In January

2016, DARPA released information on a \$60m Neural Engineering System Design program with the aim of developing an implantable neural interface able to provide data-transfer between the brain and electronics. A

few decades later Tomas Lior a rebel, a poet wants to live forever and he knows how. He has a direct connection to the net through a wetware port implanted in his nervous system and is working to build an afterlife for himself, for his mother, for us all. But when a seemingly malevolent code finds its way into his mind, everything is threatened. His journey to discover the truth of the code leads him across Europe, from London to the depths of Russia, aided by two members of the Secret Intelligence Service, as they race to stem a build up to war. As events unfold, Lior discovers truths about his mind and the origins of the code that have the potential to shake the very foundations of our civilisation and determine the future of our species. Thrilling, thoughtful and staggering in its denouement, *A Life Worth the Fleeting Suns* will intrigue and captivate you until the very last page. If you could live forever, would you?
