Description :

Prsentation de l'diteurThe year is 2056. The world is still recovering from the pandemic of 2027 caused by a meteor borne virus that wiped out half the population. Cloning has been legalized in a desperate attempt to save humanity. Dodge Kerrington, a renowned Electronics Engineer leads his team at Embedded Systems Specialist. They must design and perfect a memory transfer tool for the Human Cloning Process. ESS

prevails by creating the first successful system that records IHE (individual human experience) as a LifeFile that uploads into the brain of a newly grown clone. ESS launches the system and human immortality becomes a promising possibility. Disease Treatment Centers are bankrupt. Hospitals and Clinics convert to LifeCenters, all in the business of providing Restoration services. Total death is nearly unheard of and only hardcore religious hold outs choose natural death over Restoration. Enter the world of High Tech Industrial

Espionage with Dodge Kerrington and his best friend and security expert John Calhoun as they fight for their very lives against criminal master mind Cyrus Slade and his partner, a world renowned hacker known only as Glitch. This Duo desperately desires to obtain the new technology and the incredible power that comes with it. Its an all out battle for control of Restoration and the minds of those that created it. In a high tech game of murder, hacking, and unbridled greed, the future of humanity hangs in the balance.

Biographie de l'auteur
I grew up near Wilkinson Indiana in a small farm community south of Anderson. After High School and several jobs I enrolled at ITT Technical University in Indianapolis Indiana where I studied Electronics Engineering and Ball State University in Muncie Indiana and obtained a EET degree in Electronics Engineering. Since then my life has taken me to some quite interesting places. I have been

fortunate enough to be involved in high tech jobs such as the installation of very high tech Loss Prevention Systems you find in the casinos out in Vegas and many Financial Institutions. I worked for more than two years on the first Electric Car for GM called the EV1, the very one that inspired the movie "Who killed the Electric Car?" I spent a week at the White Sands Missile Testing Range in New Mexico as a consultant and I also worked with A.M. General Corporation, the maker of the Humvee on several projects as a consultant with their Engineering Staff. I am currently the President of a small Department of Defense Contracting

Company. Besides my unusual experience and engineering background, I have always had a wild imagination and this has led to my desire to write science fiction adventure. This is my first book in this series that I intend to publish as a trilogy. The second book Title is Restoration Revenge. The third book is Restoration Genesis.
